

# How Do I Identify the Tonality of the Music I'm Hearing?

1. Audiate the tonal center. Can you hum the resting tone?
2. Now audiate and arpeggiate the tonic triad. Does it sound more like major or more like minor?
3. Listen for characteristic tones (see flow chart).
4. When in doubt, try singing the sequence of tones in different tonalities to see which one "fits"!
